PROJECTS

TrackingTrade — AI-Powered SaaS Trading Journal | [Github](#) | Jan 2025 – Present

- Built a 10-page full-stack SaaS platform with Next.js 15, TypeScript and Tailwind CSS — Dashboard, Trade Journal, Analytics, Calendar, AI Insights and Leaderboard pages with dark/light theme and interactive Chart.js charts
- Developed Node.js + Express + MySQL backend with 6 API modules (auth, trades, analytics, AI, accounts, leaderboard), JWT authentication and auto P&L/RR calculation
- Integrated OpenAI GPT-4 API for AI coaching module — generates personalised performance scores, pattern analysis and trading recommendations based on closed trade history

ParkEase — Urban Parking Marketplace | [Github](#) | Jan 2025 – Present

- Designed and built role-based dashboards for Driver, Owner and Admin — real-time booking system, slot availability, earnings tracking and booking extension with full conflict detection
- Integrated Google Maps API (auto-geocoding, location picker, spot pins, driver navigation) and Razorpay payment gateway with HMAC-SHA256 signature verification
- Built complete RESTful backend (Node.js + Express + MySQL + JWT) with 5 API modules — auth, spots, bookings, payments and admin — deployed on Railway with MySQL database
